# From the Director and Board

Dear Utah County Residents and Community Leaders,

The year 2008 was most notable for the outbreaks which DIDN'T occur from the previous year 2007, when we experienced large outbreaks of Cryptosporidiosis, Tularemia, and Campylobacter. We believe our staff and public-wide efforts played an important part in preventing recurrences of these and similar illnesses.

Recently during an interview of a prospective employee, the applicant was somewhat apologetic that his undergraduate degree was in History. I quickly pointed out to him that a large part of what we do in public health is based on History. This is the history of diseases affecting people around the world over the past several hundred years. We have learned from this history what causes different diseases, suffering, and premature death, and what public interventions or strategies will control or prevent these diseases.

When public health programs and policies are successful, it is very easy to take them for granted because most people don't pay attention to diseases that are prevented because they aren't happening. And as the years pass, the people who don't remember the lessons learned from History forget that widespread deadly diseases were once common. And they fail to appreciate that public health programs including food and water safety regulations, immunization programs, and many others are preventing widespread disease and early death.

The philosopher, George Santayana, once said, "Those who cannot remember the past are condemned to repeat it." Many diseases will return in large numbers if we don't continue to prevent them and remember the public health lessons learned from History.

Everyone is affected by public health services and concerns every day. We appreciate our County Commission, other community leaders, and involved citizens working with our outstanding staff to keep Utah County a healthy place to live.

Sincerely,

Joseph K. Miner, MD, MSPH, UCHD Executive Director  
and the Utah County Board of Health

Mayor Jerry C. Washburn,  
Chair  
Dennis Hess, MD, Vice Chair  
Commissioner Gary Anderson  
Doris Baker, BA

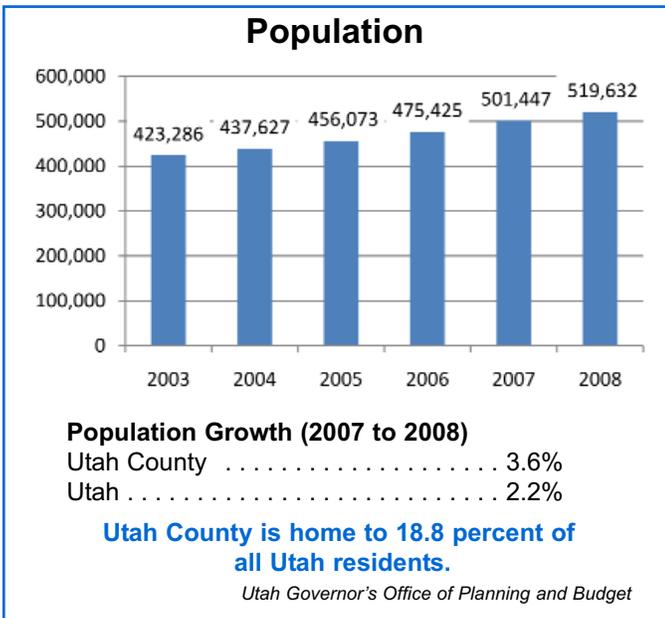

Sandra M. Huff  
Erin D. Maughan, RN, PhD  
Clyde Nielsen, RPh  
Viola Ramos, MRC  
Chris Sorensen, MEdA

The Office of Vital Records and Statistics documents the facts of births, deaths and family formation for legal purposes in Utah County and responds to the needs of health programs, health care providers, businesses, researchers, educational institutions and the Utah public for data and statistical information.

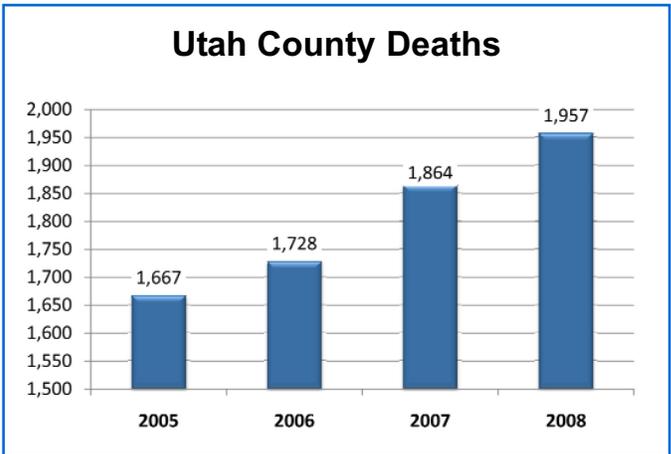

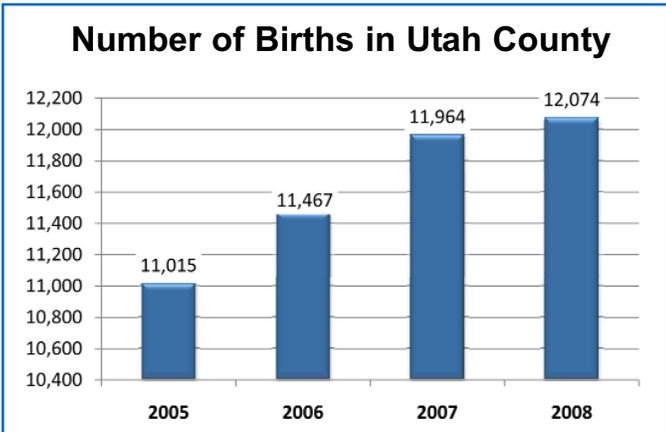

### Leading Causes of Death in Utah County

(death per 100,000 population)

	2006	2007	2008	Rank in 2007
1. Heart Disease	98.0	96.3	76.0	1
2. Cancers	68.4	68.4	68.6	2
3. Stroke	18.0	26.5	21.4	3
4. Unintentional Injuries	8.8	9.8	13.7	7
5. Diabetes	25.5	16.0	12.4	5
6. Alzheimer's	12.8	12.4	11.7	6
7. Lung Disease	18.9	16.4	10.1	4
8. Influenza & Pneumonia	7.7	9.7	9.4	10
9. Motor vehicle injuries	7.8	6.8	9.2	8
10. Suicide	9.2	6.8	8.8	11

\* Kidney disease was ranked 9th in 2007

According to the Utah Population Estimates Committee, Utah County is the second fastest growing area in the state.

### Types of Births / Fetal Deaths

	2005	2006	2007	2008
Facility Births	10,820	11,478	11,796	11,842
At Home Births	159	216	211	230
Fetal Deaths	54	63	53	53

### Traumatic Deaths

	2003	2004	2005	2006	2007	2008
Drug Related*	56	51	70	70	74	71
Suicide*	35	58	55	46	38	41
Motor Vehicle	47	34	21	43	34	48
Homicide	5	3	5	2	1	5
Other Unintentional Injury			31	42	37	26
Intention Undetermined			8		3	38

\* over half of all suicides involve alcohol or drugs.

“Health Indicators” are benchmarks that public health officials can use to interpret the overall health of their community. Information represents 2007 statistics unless otherwise noted. “n/a” indicates information that is not available. Most information is from the Behavioral Risk Factors Surveillance Data report, found at <http://ibis.health.utah.gov>.

## Physical Health

	Utah County	Utah	United States
--	-------------	------	---------------

Percentage of persons who reported having the following conditions:

Having experienced poor or fair physical health in the last month	10.3%	13.0%	15.0%	
<i>Being classified as overweight or obese</i>	1998	46.3%	49.3%	54.6%
	2008	55.0%	58.2%	63.2%
	% increase	+8.7%	+8.9%	+8.6%
9th to 12th graders with a BMI over age specific 95th percentile	n/a	8.7%	13.0%	
<i>Adults reporting being in good to excellent physical health</i>	89.7%	88.1%	83.8%	

## Nutrition

Adults who report eating three or more servings of vegetables each day	25.4%	25.2%	27.2%
<i>Adults who report eating two or more servings of fruit each day</i>	30.4%	32.9%	32.7%
Women ages 18-44 who regularly take folic acid supplements	36.7%	42.9%	n/a

## Chronic/Long Term Conditions

Percentage of persons who reported having been doctor-diagnosed with the following conditions:

Arthritis	24.1%	24.7%	26.1%
Asthma	8.6%	7.9%	8.0%
Diabetes	9.4%	6.1%	8.2%
<i>Diabetes - Pregnancy related</i>	3.0%	3.7%	n/a
High cholesterol	19.3%	22.6%	24.8%
<i>Hypertension</i>	16.0%	19.7%	27.8%

## Immunizations

Persons who reported having a flu vaccination	(ages 50+)	56.5%	59.4%	55.9%
	(ages 65+)	72.5%	76.2%	72.0%
<i>Persons who reported having a pneumonia vaccination (ages 65+)</i>		71.9%	68.8%	67.3%
Children who received the recommended vaccines (4 DTaP, 3 polio, 1 MMR, 3 Hib, 3 hepatitis B) by age 3	1997	n/a	73.6%	77.4%
	2007	87.0%	61.4%	64.4%
	% change		12.2%	13.0%

## Preventive Screenings

	Utah County	Utah	United States
--	-------------	------	---------------

Percentage of persons who reported having the following screenings:

Adults who have had a cholesterol screening in the last 5 years	60.5%	65.9%	74.8%
<i>HIV screening (adults between 18-64 years of age) (2008)</i>	19.3%	23.4%	n/a
Pap smear screening in the last 2 years (women over 40 years of age)	65.3% (2008)	74.0% (2008)	84.0% (2006)
<i>Clinical Breast Examination (women over the age of 40)</i>	59.9% (2008)	67.4% (2008)	n/a
Mammogram screening in the last 2 years (women over 40 years of age)	67.6% (2008)	67.8% (2008)	76.5% (2006)
Prostate specific antigen (men over 40 years of age)	56.6%	60.9%	54.8%
Sigmoidoscopy or colonoscopy (adults over 50 years of age)	56.4% (2008)	57.0% (2008)	48.4% (2006)

## Access to Health Care

Persons who reported having no health care coverage	14.3% (2008)	14.7% (2008)	17.2% (2007)
---	--------------	--------------	--------------

## Tobacco Use

Percentage of adults (18+) who reported current smoking cigarettes	5.8%	9.5%	20.8%
9th to 12th graders reported currently cigarette smoking	n/a	8.7%	20.0%

## Injury Prevention

Percentage of residents that wear their seat belts regularly	87.2%	86.8%	82.0%
<i>Percentage of child car and booster seats used incorrectly</i>	88.0%	90.0%	80.0%
Death due to unintentional injury (rate per 100,000)	25.6	29.7	38.1 (2005)
<i>Hospitalization due to unintentional injury (rate per 100,000)</i>	4.1	4.4	n/a

The Division of Community Health Services (Nursing) provides health care services and education for the community with a focus on prevention. The division tracks communicable disease outbreaks, provides screening and immunization services, and oversees school nurses in Utah County.

## Communicable Disease Reporting and Investigation

Disease	2004-2007 Average	2008 Cases	Disease	2004-2007 Average	2008 Cases
Amebiasis	2	2	Salmonella	43.25	47
Campylobacter	50	59	Shigella	12.75	5
Cryptosporidium	118.5	2	Tuberculosis - active	4.75	6
E Coli 0157	12.5	13	Tularemia	1.75	2
Giardia	81.75	70	Varicella	141.75	213
Hepatitis A	4.0	0	West Nile virus	26.75	1
Hepatitis B - acute	2.25	1	HIV - new cases	5.75	7
Viral/Aseptic Meningitis	47.25	28	Chlamydia	383.75	485
Meningitis/Neisseria	1.75	1	Gonorrhea	43.75	10
Pertussis	90.75	80	Syphilis	9.5	5

## Clinic Programs

	2007	2008
General Health Exams	630	637
Immunizations (general)	52,427	52,432
Immunizations - Influenza	20,521	18,181
Immunizations - School "Personal" Exemptions	1,398	1,379
Immigration Exams	417	459
Fluoride Prescriptions	571	647
Women's Cancer Screenings	1,713	1,924
Sexually Transmitted Disease (STD) / HIV	1,609	1,911
HIV Screenings	495	563
Tuberculosis Skin Tests	5,399	4,856
Welcome Baby - Home visits, prenatal 5	2,904	2,756
Welcome Baby - Medicaid Client home visit	996	1,055

The UCHD held an "Arm Yourself Against Disease" fair for the 2008 National Childhood Immunization Week.

## School Nurse to Student Ratio

Alpine District	1 : 5,340	1:5,573
Nebo District	1 : 3,946	1:4,088
Provo District	1 : 3,578	1:4,555

## Baby Your Baby's 25,000th client!

Baby Your Baby began in 1987 and has served over 25,000 clients in the past 21 years. In 2008, the UCHD honored Andrea Ashton as the 25,000th Baby Your Baby client. A media conference was held and a special gift basket was presented to her and her husband Doug.

The goal of Baby Your Baby is to reduce the infant mortality rate in Utah by educating and encouraging all pregnant women to seek early prenatal care.

# Emergency Preparedness

Utah County Health Department has adopted an "all hazards" approach to emergency preparedness. Whether preparing for a pandemic or for a bio-terrorist threat, many of the same techniques and tools are used to address an incident. And since all threats are "local," being prepared on the county level is vital to protect health and property -- and should the worst happen -- help return life to "normal" as quickly as possible.

The Utah County Medical Reserve Corps (UCMRC) is dedicated to enhancing response capabilities to disasters or emergency events and increase the preparedness of local citizens. On May 9, 2008, UCMRC partnered with UCHD, IHC Orem Community Hospital, IHC Central Orem Clinic, Orem City Emergency Responders to hold a Medical Surge and Triage drill, to simulate what might take place during a pandemic disease outbreak when the hospitals and other medical providers are overwhelmed. Approximately 40 patients were evaluated, diagnosed and triaged in a 1.5 hour period. While this is no where near what we might see in a real emergency, UCHD, UCMRC, and our partners gained valuable experiences during this exercise. We achieved our primary goal of determining that a clinic adjacent to a hospital can be successfully used to supplement the surge capacity and capability of the hospital. One key to the success of the drill was pre-training of the clinic medical staff in incident command, disaster mental health, at-risk populations in disasters, communications, and the strategic national stockpile.

## Addressing a Bio-terrorist Threat

The United States Postal Service East Bay Post Office invited the Utah County Health Department and other local emergency responders to participate in a joint exercise in 2008. The drill simulated the detection of an anthrax threat in the mail system. Members of the postal service exercised their plans, which included bringing employees to the UCHD for prophylactic treatments. Partners in the exercise include local hospitals, Provo Fire Department, Utah County Hazardous Materials Teams, and the Utah Transit Authority.

## Emergency Response Partners

Below are just some of the organizations the UCHD partners with to plan for potential emergency events:

Utah County Local Emergency Preparedness Committee (LEPC)

Community Health Incident Response Partners (CHIRP)

Utah County Government

Utah Department of Homeland Security

Utah Department of Health

Other Utah local health departments

Utah Public Safety

Wasatch Mental Health

Intermountain Healthcare

MountainStar Health Care

Local city government, police, fire, EMS, and other emergency response

Utah media

Utah Medical Reserve Corps

Alpine School District

Brigham Young University

Nebo School District

Provo School District

Utah State University

Utah Valley University

American Red Cross

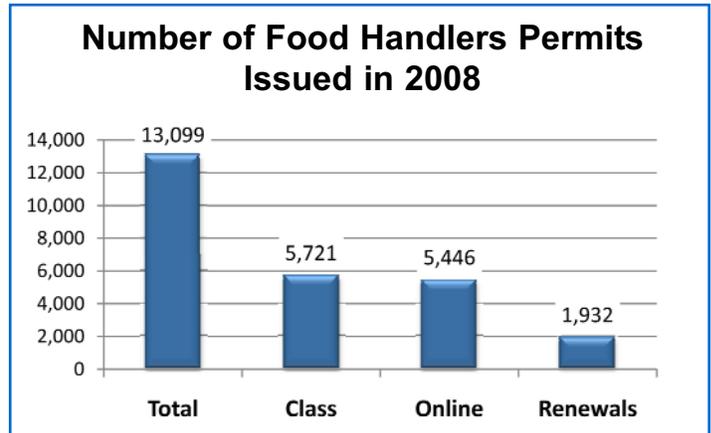

United Way of Utah County / 2-1-1

Utah Public Safety PIO Association

Volunteer Organizations Active in Disasters

The Division of Environmental Health is comprised of two Bureaus, the Bureau of Air Quality Programs and the Bureau of Environmental Health Services. The Bureau of Air Quality Programs is responsible for the administration of the Utah County Vehicle Emissions Program. The Bureau of Environmental Health Services is responsible for the enforcement of rules governing such things as on-site wastewater systems, food service, public pools and drinking water. The Division of Environmental Health performs a variety of facility inspections and responds to citizen complaints.

State law requires food establishment employees to have a valid **food handler permit**. Food handler permits may be obtained in a variety of ways. UCHD offers food handler classes in both English and Spanish. English classes are held every Tuesday and Spanish classes are held on the first Wednesday of every month. An online food handlers class is now available at [www.statefoodsafety.com](http://www.statefoodsafety.com). Individuals that have a current food handler permit from another health department can waive the training and receive a UCHD food handler permit. Food handler permits are valid for 3 years. A food handler permit can be renewed without having additional training, provided application is made within 30 days of the expiration date.

## Household Hazardous Waste

The Utah County Health Department joined with the South Utah Valley Solid Waste District and the North Pointe Solid Waste Special Service District, to sponsor the first Household Hazardous Waste Collection Day in 2008. Hundreds of residents dropped off used paint, solvents, oil, gasoline and other chemicals to be disposed of in a safe manner that would protect our environment. The event was so successful, future collection days are being planned.

The selling of food at special events and celebrations such as Fourth of July and athletic events is quite common. Vendors do this for various reasons such as fund-raisers or promoting a business. Vendors must first obtain a **Temporary Food Permit** from UCHD. Vendors must complete an application which includes a menu and then discuss safe food handling procedures with UCHD before a temporary permit is issued.

### Number of Utah County Eating Establishments

1998	1,095
2003	1,192
<b>2008</b>	<b>1,374</b>

## Cryptosporidium

In 2007, Utah saw the largest recreational water outbreak of cryptosporidium recorded by the Centers for Disease Control and Prevention. In 2008, the number of cases dropped back down to previously experienced levels. The UCHD credits this to both educational efforts to help the public address issues dealing with this threat, as well as new technologies and practices adopted by local pool operators.

Each year, the UCHD selects one individual and one organization to honor during National Public Health Week as the Utah County "Friends of Public Health". In 2008, **Representative Stephen D. Clark** and **Intermountain Healthcare** were honored.

Since the UCHD has starting recognizing Friends of Public Health, several community health programs which Intermountain Healthcare helped establish were honored. It was certainly time to now recognize Intermountain Healthcare themselves. For several decades, Intermountain Healthcare has provided millions of dollars worth of charitable health services each year to residents. Individuals who have little or no means of paying for health care are provided discounted or free services according to their ability to pay. They have also sponsored such service providers as the Mountainlands Community Health Center and the Volunteer Care Clinic.

Representative Clark, who represents his area of Utah County in the State House of Representatives, has also been a strong advocate for local public health departments with the Utah Legislature. Last year during the 2007 legislative session, he sponsored legislation to provide funding to better coordinate and standardize local health department environmental health programs throughout the State. In 2008, Representative Clark sponsored a bill to require the State Legislature to take more of the responsibility in funding the many programs of local health departments which are mandated by State law. Currently most of the State public health activities of local health departments require county commissioners to take this responsibility to levy the taxes. Representative Clark's legislation helped lead to the first significant increase in funding coming to local health departments in many years.

## Health Promotions

*The Division of Health Promotion implements health education programs to prevent and reduce the leading causes of death and disability for Utah County residents. We provide classes, workshops and technical training in the areas of cardiovascular disease prevention, injury prevention, and tobacco cessation and control. We also provide educational materials and interactive displays that can be used for health fairs, health observances and community events.*

New chronic disease prevention programs were developed in 2008 to help increase the health of Utah County citizens, including programs to prevent or assist with diabetes, arthritis, and Asthma. The Gold Medal School program is currently assisting 30 elementary schools work towards goals with the help of 8 trained school mentors.

Health Promotions staff and volunteers also worked to increase the number of tobacco free facilities in the County, including successfully sponsoring a regulation making all county parks and trails smoke free. Tobacco compliance staff also conducted quarterly "buy" attempts to prevent retailers from selling products to under age buyers, helped community advocates to address indoor clean air act issues, and provided smoking cessation services to teens and pregnant mothers.

Environmental Health Promotions has worked to establish Medication Safe Disposal Programs throughout the county to provide environmentally safe ways to dispose of unused medications.

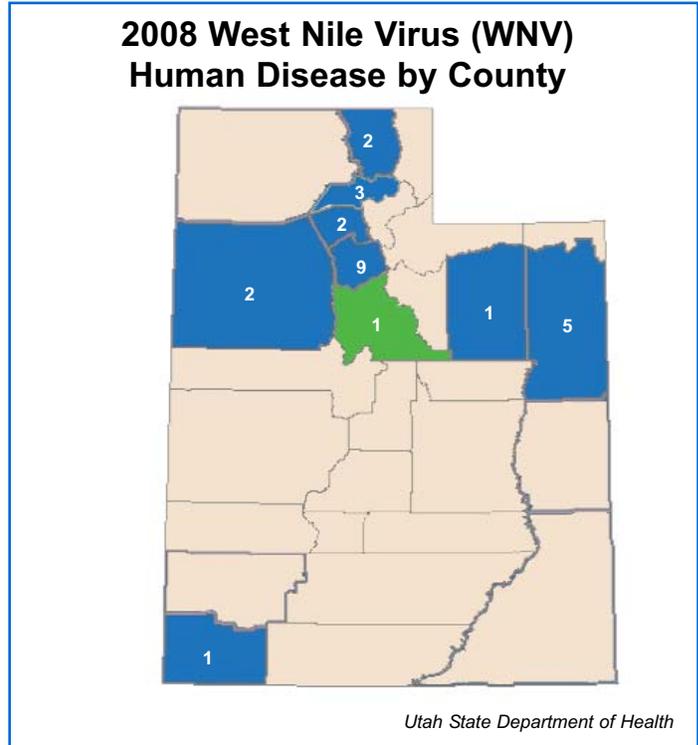

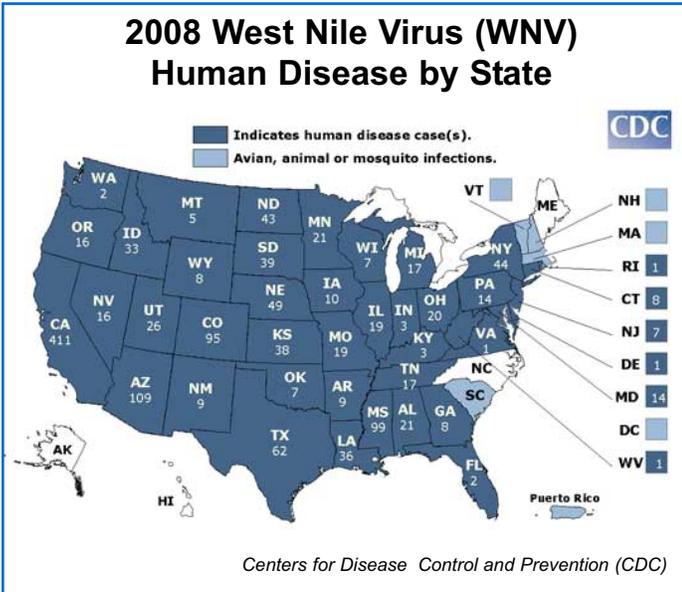

Injury Prevention staff conducted car seat classes on the proper use of child passenger safety seats as well as provided car seat inspections both at our facility and at numerous checkpoints throughout the community. They also worked to instruct parents on the new 2008 booster seat law and to encourage such other safe habits as seat belt and helmet use and healthy lifestyle choices.

### Health Promotion Programs

- Medication Safe Disposal Program
- Household Hazardous Waste Collection Day
- Pool Safety
- Radon Gas awareness
- Spot the Tot back-over prevention
- Utah County Asthma Coalition
- Utah County Healthy Lifestyles

# Mosquito Abatement

The Division of Mosquito Abatement of the Utah County Health Department is responsible for managing wetland mosquito breeding areas. The Division also monitors mosquitoes and birds for encephalitis viruses and provides different control measures throughout Utah County communities.

Mosquito trapping allows us to compare the number of mosquitoes each year, as well as gives us a way to check to see if WNV has entered an area. Each year, thousands of mosquitoes are trapped by mosquito abatement personnel.

**Total Trapped**

2005 - 81,000	2007 - 42,000
2006 - 49,000	2008 - 42,000

### Positive Test Results for West Nile Virus

WNV Monitoring	Utah Total 2007	Utah County 2007	Utah Total 2008	Utah County 2008
Humans	68	2	26	1
Mosquito Pools	225	3	140	5
Horses	18	1	7	1
Wild Birds	19	0	n/a	n/a
Sentinel Chickens	74	1	16	1

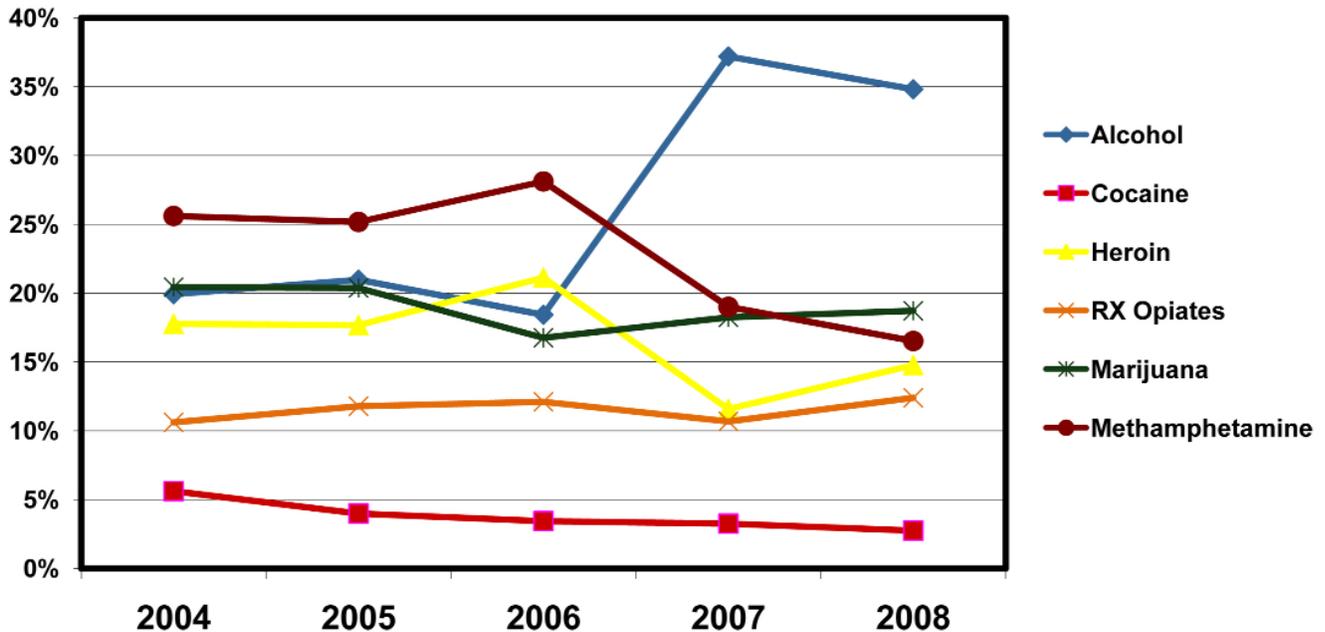

The 2008 year began with a late warming, wet spring delaying normal mosquito emergence about two weeks. By July mosquito numbers were as expected with 80% of trapped mosquitoes being potential West Nile Virus vectors. Over 900 service calls were responded to during the 2008 season. RAMP testing was initiated this year, meaning our own lab could provide same day results for positive WNV mosquitoes. This added to our ability to control disease threats immediately. Over 5,000 new catch basins were identified and added to our data base and treatment for control. WNV infection rate in surveillance chickens and trapped mosquitoes was very low for a second year. Continued efforts were made to target vector mosquitoes as their numbers increased in an effort to reduce potential human health impact. Evening fogging with trucks, aerial spraying, coupled with regular larval control were instrumental in a very effective year.

# Substance Abuse Prevention and Treatment

The Division of Substance Abuse is the Local Substance Abuse Authority for Utah County and is responsible for prevention, treatment, and early intervention programs for both youth and adults. Substance abuse takes many forms, including abuse of illegal narcotics, abuse of prescription drugs, and the use of alcohol by underage individuals. The Division provides outreach to at risk groups, as well as education materials for prevention of substance abuse.

Percentage of Total UCHD, Division of Substance Abuse Treatment Admissions by Primary Drug of Choice

## Substance Misuse and Abuse Reduction Team

The Substance Abuse Prevention team at Utah County is working with a coalition of community members called SMART (Substance Misuse and Abuse Reduction Team) to reduce abuse of prescription pain medication and the number of alcohol related motor vehicle crashes in the county. This coalition is composed of doctors, law enforcement representatives, PTA members, parents, pharmacists, religious leaders, treatment professionals, public officials and other community members. SMART has been working to gather information to identify the extent of alcohol and drug abuse in Utah County. The data will help SMART target prevention efforts toward groups more at risk. SMART also worked to encourage individuals to "Clean out the Cabinet" and properly dispose of unused medications before they could be stolen and misused or pollute our lakes and streams.

Many goals established by the Division of Substance Abuse for 2008 were delayed or cancelled because of budgetary constraints. However, DSA made several notable achievements during 2008.

Utah County's DORA program was the first new DORA program to reach target capacity. The graduation rate for DORA in 2008 was 69% - over twice that of the statewide comparison group. The Prevention program management and staff assisted in the success of the first Commissioner's Cup golf tournament at Thanksgiving Point raising funds for the Promise of Women and Families treatment programs. The Prevention program also began implementation of the statewide Strategic Prevention Framework grant. The early stages of this grant are designed to gather data and create a plan to intervene ecologically on the county's DUI and prescription drug abuse problems. Gordon Bruin was certified as a Motivational Enhancement Therapy trainer by the Mountain West Addiction Technology Transfer Center. Gordon will invest much of his time during 2009 training and certifying DSA staff as competent to counsel clients using this evidence based treatment modality.

The Special Supplemental Nutrition Program for Women, Infants, and Children - WIC - has improved at-risk children's health, growth and development, and prevented health problems for 34 years. WIC children enter school Ready to Learn, showing better cognitive performance. Services for clients in our county are offered in clinics in Orem, Provo, Payson and American Fork. Services are provided without charge.

Number and Type of Clients				
	2006	2007	2008	% change from 2007
Pregnant	1,499	1,206	1,352	+12.1%
Breastfeeding (BF) Women	1,505	1,514	1,559	+2.97%
Non-BF Women	505	760	719	-5.7%
BF Infants	1,655	1,517	1,518	+0.01%
Non-BF Infants	1,734	1,537	1,576	+2.54%
Children	5,644	5,853	6,589	+12.6%
<b>TOTAL</b>	<b>12,542</b>	<b>12,387</b>	<b>13,313</b>	<b>+ 7.5%</b>

Increasing food costs and decreased rebates from the infant formula contract were expected to result in insufficient food funds in 2008. The state WIC program cost containment strategies included eliminating more expensive juices, limiting peanut butter and cheese, and changing to medium sized eggs. Increased federal funding in response to the concerns that clients would need to be taken off the program and the cost cutting strategies implemented should eliminate the need for caseload reductions in this fiscal year.

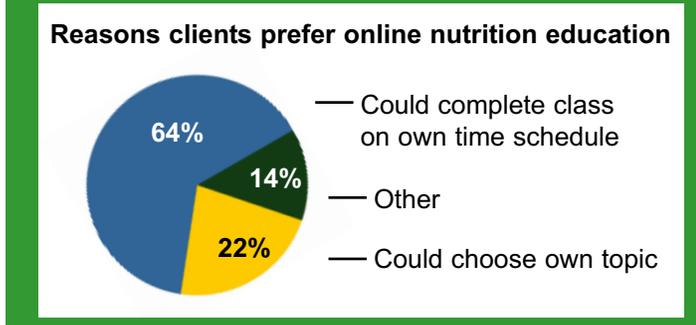

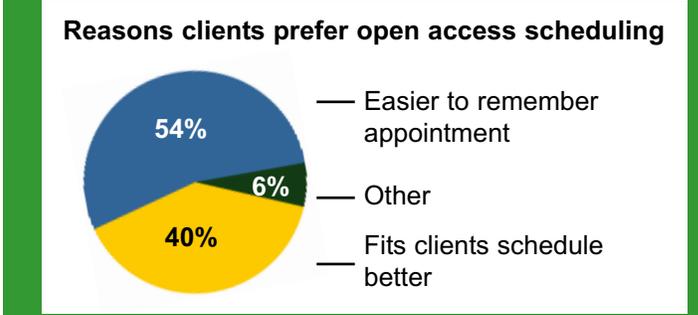

The average food cost per WIC client per month in 2007 was \$41.77.  
 In 2008, the average was \$43.33.  
 This plus the fact of the increase in the number of clients shows a growing need in our community.

## Open Access Scheduling

Utah County WIC implemented Open Access Scheduling in three clinics in 2008. Open access scheduling allows the client to call the month they need their appointment rather than making the appointment three months in advance. From a survey of 181 WIC clients, 86% prefer the new scheduling method. Clients who still want to make appointments in advance may do so.

## Online Nutrition Education

Utah County WIC implemented online nutrition education in January of 2008. From a survey of 181 WIC clients, 76% had completed an online class. All WIC clients who completed online classes liked the option of receiving nutrition education this way.

## Utah County Health Department Fund

Total Budget for 2008 was \$14,329,882, not including \$6,686,111 in non-cash WIC Food Vouchers, \$263,889 in non-cash federal vaccines, or \$2,517,000 in a one-time land purchase for a North County facility.

### Revenue Sources

Contracts	24.8%
Fees	41.9%
Taxes	17.5%
Fund Balances	15.8%

### Expenditures

Personnel Costs	69.7%
Operating Costs	29.8%
Capital Costs	0.5%

## Utah County Substance Abuse Fund

Total Budget for 2008 was \$7,980,069.

### Revenue Sources

Contracts	70.0%
Fees	19.7%
Taxes	6.4%
Fund Balances	3.9%

### Expenditures

Personnel Costs	51.3%
Operating Costs	48.4%
Capital Costs	0.3%

## Health Partners

The citizens, businesses, cities, and organizations of Utah County, with special thanks to . . .

## Utah County Health Department

### Our Vision

Healthy People in Healthy Communities

### Our Mission

Promote health and prevent avoidable disease and injury by monitoring the health of our community and assuring conditions in which people can be healthy.

### Our Values

- Careful, open, and fair consideration of the concerns and cultural values of all people.
- Excellence in science, communications, collaboration, and operations.
- Timely, effective, consistent, and professional customer service.
- Wellness, healthy lifestyles, and a safe and healthful environment.
- Partnerships with private and other public organizations within our community.
