

W

What you do makes a difference!

You might not think that you can help solve the problem, but you can! The average home can accumulate as much as 100 pounds of chemical wastes each year - from common household and lawn and garden products such as:

- » Paint
- » Paint Thinners
- » Cleaning solutions
- » Degreasers
- » Pesticides
- » Weed killers
- » Fertilizers
- » Antifreeze
- » Motor Oil
- » Gasoline

For additional information, please contact the Utah County Stormwater Coalition at 801-851-7873 (PURE) or visit us online at www.utahcountyonline.org .

The gutter in the street outside your home carries water into a network of storm drains that lead straight to local creeks and rivers. Storm drains are separate from the sanitary sewer system (which handles wastewater from your sinks, tubs, and toilets). Unlike wastewater, stormwater is not treated at a sewage treatment plant. Stormwater goes directly from the storm drainage system into local creeks and rivers.
